Register of the
Grace Amadon Collection
Collection 154
Scope and Content

Grace Edith Amadon (1872-1945) received her education at Battle Creek College where she learned Greek and Latin. She was also proficient in music. In 1893 Miss Amadon was invited by the Mission Board to go to Cape Town, South Africa, to teach Greek, Latin, mathematics, and music at the Claremont Union College. After returning from the mission field in about 1899, Amadon was in charge of the Battle Creek church school for two or three years. Between 1903 and 1912 she lived in Chicago where she served as a bacteriologist and taught pathology and other science subjects in a Chicago college.

After spending more then twenty years caring for her elderly parents, Miss Amadon was invited by the General Conference of the Seventh-day Adventist Church to join a specially formed research committee in January 1939.

Grace Amadon made a distinct contribution to astronomical science by confirming the validity of the time prophecies of the Bible. She made contacts with associate astronomers of the United States Naval Observatory and several of her articles were accepted for publication by scholarly journals.

This collection contains Amadon’s research concerning chronologies and time prophecies of the Bible. The collection is divided into the following categories: 1) correspondence; 2) Amadon’s writings; 3) sources arranged by subject; 4) photostat sources.

Arrangement

In most parts, the present collection was arranged by the Adventist Heritage Center. The headings of the subject file and source documents, however, were assigned by Amadon herself. The researcher should note that some of Amadon’s correspondence related to a particular subject are placed with the corresponding subject file. We have also tried to match as much as possible the subject headings in part II (Amadon’s Writings), part III (Subject File and Source Documents), and part IV (Photostats). In addition, there are some oversized documents. These are in Box 22. The photostat documents are placed under subject headings without any particular order. The number of documents under each subject heading, however, is given. There is also a list of photostats supplied by Amadon (Box8 Fld17).
Provenance

The collection was originally given to the Seventh-day Adventist Seminary while still in Washington. It was donated at a later date to the Adventist Heritage Center after the Seminary moved to Berrien Springs, MI.

Use

All users of this collection will be required to complete the “Application to Use Unpublished Record,” and to observe the regulation specified in the “Patron’s Agreement” and “Researcher’s Code of Conduct.” All records in this collection are open and available for research. Citation for this collection:
